2005 Street Rehabilitation – Vine Street and Mitchell Avenue

WHAT/WHEN: As part of the City of Cincinnati's ongoing efforts to improve neighborhoods, crews of Barrett Paving and Materials, Inc. are currently making street improvements in Avondale on Vine Street from Mitchell Avenue to Erkenbrecker Avenue, and Mitchell Avenue from Vine Street to the I-75 South exit ramp.

The improvements include removing the existing asphalt surface and resurfacing the entire pavement with new asphalt, installing bus pads, and repairing and replacing existing curbs.

To minimize the impact on traffic, crews will perform the work between 9:00 a.m. and 4:00 p.m. and 6:00 p.m. to 6:00 a.m.

Barrett should finish the project by October of this year.

Because the work may cause some traffic delays, motorists may wish to seek alternates routes to their destinations.

The Department of Transportation and Engineering oversees the rehabilitation and improvement of streets in the City of Cincinnati. The Department also does transportation planning, design, engineering services, structural and geotechnical services, right of way regulation, and construction management. It is the clearinghouse for all City and regional transportation functions, and serves as a liaison to the Southwest Ohio Regional Transit Authority. For more information about our department, visit **www.cincinnati-oh.gov**.
